

Instrumental Variables and Causal Inference

Wednesday November 16th

- 01:00 PM - 01:15 PM Welcome
- 01:15 PM - 02:00 PM **Neil Davies**
To IV or not to IV, that is the question
- 02:00 PM - 02:45 PM **Stijn Vansteelandt**
Survivor bias in Mendelian randomisation analysis
- 02:45 PM - 03:30 PM **Vanessa Didelez**
Recent challenges for Mendelian randomisation analyses
- 03:30 PM - 04:00 PM Coffee break
- 04:00 PM - 04:45 PM **Niels Richard Hansen**
Recurrent event time modeling: predictive and causal models
- 04:45 PM - 05:30 PM **Eric Tchetgen Tchetgen**
New results on instrumental variable inference of the average causal effect of treatment
- 06:30 PM - Dinner

Thursday November 17th

- 09:00 AM - 09:35 AM **Torben Martinussen**
Estimating in the structural Cox model in an instrumental variable framework
- 09:35 AM - 10:10 AM **Mats Julius Stensrud**
Some issues with time in Mendelian Randomization studies
- 10:10 AM - 10:45 AM **Theis Lange**
Bounding IV estimates using mediation analysis thinking
- 10:45 AM - 11:15 AM Coffee break
- 11:15 AM - 12:15 AM **James Robins**
Instrumental variables with time dependent treatments
- 12:15 PM - 01:00 PM Open discussion / Lunch
